

Fiberstone Pot

Fiberstone Pot

A classic modern profile that is perfect for indoor use. Featuring a simple profile, this planter is a favorite for rustic modern spaces.

Fiberstone is a high-temperature ceramic/steel composite of high purity refractory ceramic. Fiberstone gives the look of concrete/stone but weighs a fraction of the natural material.

The hand crafted Fiberstone planter features a weather resistant finish. Its dense side wall does not require a top lip, and is an incredibly durable product. Though drainage is available, this planter is watertight and is commonly used for indoor applications.
